

Lease of Naval Bases For Western Defence Pleases Great Britain

PREMIER KING PROPOSED FOR WAR CABINET

Symbol To World Empire
Fights As Free
People

LONDON, Aug. 21.—The name of Prime Minister Mackenzie King was mentioned in the House of Commons Tuesday by Sir P. A. H. Harris, Liberal, when he suggested that a recognized leader of opinion should be brought into the cabinet.

"It would be a good thing if the premier could call to his council at the present time not only representatives of the dominions but also some recognized leader of opinion who could be brought into the cabinet," the British member said.

Mr. Mackenzie King, who was mentioned in the House of Commons Tuesday by Sir P. A. H. Harris, Liberal, when he suggested that a recognized leader of opinion should be brought into the cabinet, the British member said.

The member made the suggestion while paying tribute to Mr. Churchill for his war speech and said "we have our allies in Europe, our friends in the new world and our dominions responding as free people to give us help."

Mr. Churchill, who was mentioned in the House of Commons Tuesday by Sir P. A. H. Harris, Liberal, when he suggested that a recognized leader of opinion should be brought into the cabinet, the British member said.

LONDON, Aug. 21.—The Daily Herald said Tuesday of Prime Minister Churchill's announcement of the government's offer to lease to the United States defence bases on Britain's trans-Atlantic territories that it was "a grand piece of news."

"Now those territories become something more than mere 'possessions of Great Britain,' the newspaper said. 'They'll be the strong points of the world order.'"

The Daily Mail said the nation welcomed the announcement as the proper development of inevitable increasing cooperation between ourselves and the United States, not only in defence of common liberties of mankind but in the wider sphere of action where we can jointly secure the new world order.

And good-will cannot be lacking when the self-interest is direct and so strong," it added. "The insurance against aggression which the defence will be mutual. And there can be nothing to fear and much to gain in relating as tenants a kindred and friendly people who have always been such near neighbors."

The Times described the offer as a practical recognition of the repeated affirmation by United States leaders that the defence of the world is a bound up with an allied victory.

NO TRANSFER
Mr. Churchill's speech was interrupted by the Times, and if, as Mr. Churchill remarked, the organization of the empire and the public service in connection therewith are to be moved together for some purpose, then before it is the first step, the transfer of the empire must be made as inevitable.

GERMANY HAS
FOOD ENOUGH
SAYS DALTON

LONDON, Aug. 21.—Germany has food enough to feed her vast population, said the British minister of economic warfare, said the House of Commons Tuesday.

He said the British had about 1,000,000 tons of food in Germany, said the House of Commons Tuesday.

He said the British had about 1,000,000 tons of food in Germany, said the House of Commons Tuesday.

His Highness Registers a Kick

The camera caught the Duke of Windsor in his informal pose, apparently kicking the "new crumple" out of his legs after his ocean voyage from London to Hamilton, Bermuda. He and the Duchess are pictured relaxing in the gardens of Government House.

AIR MINISTER
VISITS BASES
IN OLD COLONY

Mr. Power Greatly Impressed With Newfoundland Airport

NEWFOUNDLAND AIRPORT. Aug. 21.—Canada's air minister and associate minister of national defence, Hon. C. G. Power, reached this great Newfoundland air base Tuesday on his tour of inspection of the dominion's eastern command, which includes this island colony.

The subject minister and his party made the 10-minute air trip from the British Columbia airport to the Newfoundland airport, which was the first of the facilities there.

Mr. Power, who was accompanied by his wife and two children, was met at the airport by the local air commander, who showed him the various facilities of the base.

TIME IS SHORT FOR CITIZENS TO REGISTER

Ottawa Will Exact Heavy
Penalties From All
Evaders

OTTAWA, Aug. 21.—Officials in the capital Tuesday night expressed general satisfaction with the progress of national registration which ends tonight. Mr. Justice T. C. Davis, deputy minister of war services in charge of registration, said:

"The response Monday and yesterday has been magnificent and with the limited effort of all the people of Canada, registration should be complete by tomorrow night."

"All I have to suggest to the Canadian public is that Wednesday we all pull together and with one tremendous effort put this registration over."

SHOW OFF
"Let us show the world that a democracy can move in a hurry and with a capability of acting unitedly and voluntarily as quickly as any autocracy can do by compulsion."

James Cantoway, chief registrar, said his report showed "heavy registration throughout the day and busy booths from early morning until late at night."

The department of National War Services issued a warning that after registration was completed there would be a careful checkup in order to guarantee the record to be as perfect as possible.

Penalties will be imposed on those who fail to register. Regulations being prepared will provide penalties for falsification of cards both for those who print cards designed to act as substitutes for the authentic cards and those who have such cards will be subject to a maximum penalty of three years in prison.

RE-CHECK MADE
At a later date, the warning continued, there will be a recheck of those employed in factories and other places of business. The job of those who registered will be checked against actual returns.

WINNIPEG, Aug. 21.—Several registration centers in the prairie province closed last night, according to estimates of officials. It was estimated that about 10,000 men, women and children had registered in the last day of national registration.

Through the day, men, women and children from the old land had been streaming across the coast. More had landed Monday night, including about 300 of the government's military forces.

Those waiting were under the guardianship of Mr. Rupert Brooke, a military officer, who was in charge of the registration center.

Five inmates added to the wartime hospital would add to the list of those who had registered in the last day of national registration.

Joint Defence Board Will Study Problems Only States Premier

OTTAWA, Aug. 21.—The setting of a joint defence board by the Canadian and American governments involves nothing which necessitates a specially early reconvening of parliament, Prime Minister Mackenzie King stated last night. Unless something turns up, he said, parliament would not meet before Nov. 5, the date to which it adjourned two weeks ago.

That board, Mr. King emphasized, was fundamentally and essentially for the study of common defence problems. It involved no commitment of the present time. It would merely study the merits and demerits of various defence proposals.

At the same time, President Roosevelt told a press conference that he was considering the Canadian composition of the board and its personnel would probably be announced in the near future, simultaneously with Washington's personnel arrangements.

At the same time, President Roosevelt told a press conference that he was considering the Canadian composition of the board and its personnel would probably be announced in the near future, simultaneously with Washington's personnel arrangements.

WILLKIE AGAIN SEEKS DEBATE ON DEFENCES

Republican Candidate Says
Program Of The U.S.
Inadequate

RUSHVILLE, Ind., Aug. 21.—Criticizing the United States administration's defence program as "hopelessly inadequate, delayed, and improperly organized," Wendell L. Willkie suggested today that he and President Roosevelt debate the issue during one of the President's visits to preparedness projects.

Willkie's proposal followed a renewal of his invitation that his Democratic opponent, now, join in "public discussion" on all campaign questions. The renewal was made at a press conference yesterday after Mr. Roosevelt had turned down the original challenge by saying conditions made it obvious he could not campaign.

Asked his views on the new United States-Canada defence "public discussion" on all campaign questions. The renewal was made at a press conference yesterday after Mr. Roosevelt had turned down the original challenge by saying conditions made it obvious he could not campaign.

PIONEER OF CALGARY, MRS. PATRICK, DIES

CALGARY, Aug. 21.—One of Calgary's best known pioneer women, Mrs. Margaret Charlotte MacPherson Patrick, wife of Alexander Patrick, died Tuesday morning. She was 75 years of age and had resided here for more than 40 years.

Mrs. Patrick was born in Nova Scotia, and was the daughter of Joseph Edward MacPherson, a British army officer and was a niece of the late Sir John MacPherson.

Surviving besides her husband are two daughters, Mrs. M. J. MacPherson, who resides in Calgary, and Mrs. A. J. MacPherson, who resides in Edmonton. Two sons, Mr. J. E. MacPherson and Mr. A. J. MacPherson, also reside in Calgary.

Good Progress In Harvesting Prairie Crops

OTTAWA, Aug. 21.—Good progress was made in harvesting the 1940 crop on the prairie during the week ending Tuesday, according to statistics reported Tuesday.

The 13th of a series of 15 weekly reports on the progress of the harvest in the prairie provinces.

Although harvesting was delayed in some areas by heavy rains in the middle of the week, the weather cleared up and harvesting resumed.

Canadian Troops Will Be Issued .38 Calibre Pistols

OTTAWA, Aug. 21.—To comply with British standards, Canadian troops in Europe are now being issued special .38 calibre pistols to replace the .45-calibre arms previously issued.

Bomb Explodes In Post Office Injuring 2 Men

WASHINGTON, Aug. 21.—A bomb, described by police as small and poorly constructed, exploded today in a branch post office, injuring two employees.

The bomb, in a mail bag being unloaded from a truck, was a glass form, two in a package addressed to a woman whose name authorities withheld.

Those injured were Harry B. Hess, 38, and Myron Morrison, 35, both of whom suffered minor and no serious injuries.

WEDNESDAY, AUGUST 21, 1940.

The Bulldog Breed

Britons the world over thrilled on Tuesday to the speech of Winston Churchill. No man or woman, in no matter what part of the empire they live, could fail to react to the magic of the heartening words of the British prime minister. This was no blasting Adolf Hitler, giving orders to his goose-stepping ranks of brown-shirted browncoated Nazis; no boastful Mussolini issuing commands to his black-shirted baby bombers, but the free leader of a free people, telling of the sacrifices that had already been made and of the sacrifices yet to come, but promising in the end that all would come well.

Winston Churchill did not attempt to minimize the dark times ahead. He made it plain to all that the war is not yet over and that in fact it has only just begun. Great Britain is not yet safe from the threat of invasion. He did not hold out hope that within a few weeks or a few months or more Germany would get tired or that Italy would get tired. Rather he took a long view of the situation, and if he had still nothing to offer for the immediate future but "tears and blood and sweat," he made it abundantly clear that at long last, when the spirit of Hitlerism and of Fascism has been laid low, the long weary trail will be found to have led the whole world to "broader lands and better days."

As with other democracies the British Empire was slow to start in this war, but now that the empire has rallied it is found that modern war is "well suited to the genius and the resource of the British nation and empire."

Already the tide is turning. Great Britain is not now wholly on the defensive. Night after night, month after month, British bomber squadrons travel far into Germany and inflict shattering blows upon the whole of the technical and war-making structure of the Nazi and Italian power.

The war is already nearing its first anniversary, but despite disaster after disaster which culminated in the surrender of Belgium, the over-running of Holland, of Norway, Denmark and Luxembourg, and finally the defection of France, the British Empire still stands alone and undimmed against disaster, and in the words of the prime minister "standing erect, sure of ourselves, masters of our fate and with the conviction of final victory burning unquenchable in our hearts."

That there was ample reason for these brave words was evident from Mr. Churchill's appreciation of the situation as it exists today. The British fleet, the mainstay of the Empire, is still intact. The Royal Air Force is far superior both in men and machines than it has ever been in history. The greatest army ever to be mobilized in Great Britain is now defending those islands which are the heart of the empire. More than 2,000,000 fighting men have rifles and bayonets in their hands ready to repel all invaders, and they are backed by an immense mass of munitions of all kinds, cannon, rifle, machine-guns, tanks, shells and cartridges. The seas and oceans are open to British ships. The U-boats are contained. The magnetic mine is mastered. The merchant tonnage under the British flag after a year of unlimited U-boat war and after eight months of intensive mining and bombing attack is larger than when war was declared, and in addition there is another 4,000,000 tons of merchant ships from the captive countries now under British control. Stocks of food and necessities of all kinds are many times as great in the British Isles today as they were in the piping times of peace.

Mr. Churchill recounted all this, not in the nature of a boast, but because the people have a right to know that there are solid grounds for the confidence which their leaders feel, and that they have every good reason to believe that the British Empire is capable of continuing the war. "If necessary alone, if necessary against."

The gradual drawing together of the two great organizations of English-speaking democracies, the British Empire and the United States, was seen in the British leader's offer to discuss the leasing by the United States of air and naval defence

bases in Canada, Newfoundland, and the West Indies for "mutual and general advantage."

"For my part, looking out upon the future, I do not view the process with any misgiving," he said in this regard. "I could not stop it if I wished... like the Mississippi it just keeps rolling along. Let it roll. Let it roll full-flood, inexorable, irresistible, benignant, to broader lands and better days."

Brave words, heartening words, which will find an echo in the hearts of free men and women the world over. And they are words which speak the doom of Hitlerism and Fascism. The issue is clear. Democracy versus dictatorship. The democratic form of government against an unscrupulous armed revolution that seeks to impose not only its will so far as territory and spoils are concerned, but which also seeks to make slaves of the individual and to bring the whole world under the iron heel of the dictators.

Mr. Churchill made it abundantly clear that as long as the Empire stands the Nazi dream of world domination will not come to pass. The war will not be won this year, nor next year, he says.

"But our offensive springs are slowly being compressed and we must resolutely and methodically prepare ourselves for the campaigns of 1941 and 1942."

And Britons the world over will rally to that call from the man chosen to lead the Empire in its greatest hour. Not today and not tomorrow perhaps, but ultimately and surely the Nazi war machine will be smashed, and on that day freedom will again prevail for all men.

Fifty Years Ago

From the Files of The Edmonton Bulletin

The publication of the correspondence between the governments of Great Britain and the United States regarding seal fishing in the Behring sea has not a new face on the matter for Canadians. During the negotiations Lord Saltonstall said that under the act of parliament to give effect to the fishing regulations for an order-in-council to have war vessels co-operate in the matter of protecting the seals could be drafted "until Canada is heard from." The declaration shows that Canada was not an ally rather than as a vassal of Great Britain and throws the burden of responsibility for consequences upon Canada, where it should properly rest as the quarrel is Canada's rather than Britain's.

Forty Years Ago

London: Li Hung Chang cables that the allied troops entered Peking on August 15th. The allies are attacking the inner city and fighting continues. The danger appears to be among those in the inner city.

In consequence of the landing of British troops at Shanghai, the French have decided to land 150 marines there. The success of Lord Salisbury's statement in London, as an ally rather than as a vassal of Great Britain and throws the burden of responsibility for consequences upon Canada, where it should properly rest as the quarrel is Canada's rather than Britain's.

Thirty Years Ago

An agreement has been reached whereby the city will be given twenty acres of land for a new school and a return for the construction of the proposed order among the Great railway.

Calgary: A truck was being delivered to the district between the C.N.R. and the C.P.R. with reference to the business of land owned by the latter. The C.N.R. will now be able to proceed with the construction of the line into Calgary.

The newly formed Great Society is preparing an interesting program of entertainments for the winter.

H. L. Sawyer, D.L.S., returned yesterday with the mail from the north.

Twenty Years Ago

Calgary: May 18th last evening a blaze on the tracks in Grand Prairie city and the Peace River valley.

The Great of the Great Society is preparing an interesting program of entertainments for the winter.

The newly formed Great Society is preparing an interesting program of entertainments for the winter.

Ten Years Ago

New York: The World publishes a statement estimating the number of unemployed to be in all countries at 16,000,000. By countries the figures given are: Great Britain, 6,000,000; Germany, 2,500,000; United States, 2,000,000; Russia, 2,000,000; Italy, 2,000,000; Australia, 1,000,000; Hungary, 400,000; Japan, 300,000; Austria, 180,000; Canada, 175,000; France, 20,000; other countries, 2,000,000.

Calgary: A line of armed men entered the Elbow Park branch of the Bank of Montreal, making off with \$7,500.

Halifax: The province of Nova Scotia has officially returned to the first column. Government dispensaries now bring open for business.

Progress has been slow, discouragements have been frequent... but from decade to decade and from century to century the net result has been a general advance... (Henry L. Stimson, U.S. secretary of state).

The Passing Show

By J. S. COWPER

To be a successful member of the R.A.F. with as well as courage are needed. Intelligence tests are given applicants. One favorite question is: "deceiving in its simplicity—is that?" On a table in a dark room are twenty socks—ten brown and ten black. You are asked to bring back a pair that matches. The smallest number you DO YOU NEED? must bring, to make sure that you have a pair that match? Some of the cocksure ones say "Even." The correct answer is "Three." The first two you pick up may be of differing color, but the third must match one or other of them.

Simple enough when you reason it out. That's what the question is for, to find out who uses reason and who guesses at answers.

You'll readily believe that the Nazis will resort to any trickery to achieve their aims, because totalitarianism believes that any device is justified that secures the desired end. You've sometimes seen pictures of cities in flames. The Nazis have captured, all holding out their hands in what seems like the Nazi salute. Columbia Broadcast-System recently disclosed that the Nazis had captured, all holding out their hands in what seems like the Nazi salute.

A German military band was playing in downtown Paris. Thousands were listening. Suddenly the music stopped. A German voice rang out through a loud-speaker. "Those who do not speak the German language raise their hands." Virtually every one in the crowd raised a hand. A flash, and a German photo was taken to show the world how the Parisians have been won over to give the Hitler salute.

Since trick photography was developed by the movies, everyone knows that a photo is not necessarily a true presentation. Nothing that emanates from Nazi cameras but is open to doubt.

If you're one of those persons who are medium in height and build and appearance—one who can pass unnoticed in a crowd—be grateful to Providence. You really have the best of it, as matter how much you may admire other folk of more majestic build.

Scientists turned to the study of endocrine glands. British army authorities from experience, in selecting troops for special work, have found that men of medium height and build. They stand up longest to strain.

There died the other day at the age of 22, the tallest and heaviest man of the age. He was 8 feet 10 inches tall and weighed 491 pounds. You'd have thought him to be a fearsome adversary. In fact he was a weakling, and he died from the result of the force of his own weight.

You don't have to know much about the pranks of the pituitary gland and the habits of hormones to see that from an engineer's viewpoint an outsize chap like Robert Wadlow was handicapped in many ways. Any other machine, a man has length, breadth and thickness. They must be adjusted to the material of which he is made. All that length and weight, supported on a cross-section of the knee, was too much for the body. Bones increased in more than arithmetical proportion to support the load. Poor Wadlow, in addition to the annoyance of gaping crowds and cruel witicism, had literally to watch his step lest he fall and break his bones.

Normal at birth, his pituitary gland ran away with him, through some whim or oversight of Nature. When you consider how admirably Nature has fashioned man, it is hard to understand, Hamlet's (or Shakespeare's) tribute taken for fuller meaning when he says, "What a piece of work is a man! How noble in reason; how infinite in faculties; in form and moving how express and admirable; in action how like an angel; in apprehension how like a god!"

Yet none of this will bring comfort to the poor giant with sluggish thyroid and excellent digestion, who is handicapped in every way. They are developing. Nothing remains for them but to move the load from side to side when asked to take a second helping—or to do a turn in the end of a crosscut saw.

Announcement that it requires 2,490 drawings of the Boeing B-29, the latest and largest bomber, is a reminder of the knowledge that a winter's wait must be endured till mass production airplane engines come from the assembly line, recalls the story of Eli Whitney, the father of assembly line production.

The inventor of the cotton gin was a slaveholder. He had made a contract with the U.S. government after the War of Independence, to supply 10,000 muskets in 1800. At the end of the first year only 500 had been produced. At the end of the second year, with deliveries far behind, the government was pressed to end the contract. Young Whitney hastened to Washington. He brought a box containing 100 muskets made from ten identical barrels, ten identical stocks, etc. The experts saw the value of the idea for interchangeable parts and entered his name. He had made a contract with the government to supply 10,000 muskets in 1800. At the end of the first year only 500 had been produced. At the end of the second year, with deliveries far behind, the government was pressed to end the contract. Young Whitney hastened to Washington. He brought a box containing 100 muskets made from ten identical barrels, ten identical stocks, etc. The experts saw the value of the idea for interchangeable parts and entered his name. He had made a contract with the government to supply 10,000 muskets in 1800. At the end of the first year only 500 had been produced. At the end of the second year, with deliveries far behind, the government was pressed to end the contract. Young Whitney hastened to Washington. SCB-DESS STYLE
For Dress Up Occasions

Here is something very special for the younger crowd. A girlish skirt that fits as snug as a whale around a young waist fits smoothly over the hips and flares to a generous hem. Blouse fulness is softly becoming to a youthful face and figure and they both trimming adds a novel touch to a smart frock.

Choose this frock for important dates on vacation and at home, for a sure fire social success. Perfect in printed rayon crepe or sheer cotton with ribbon waist to bring out the pink or blue in the print.

Style No. 2976 is designed for sizes 11, 13, 15, 17 and 19 years. Size 13 requires: 4 yards of 39-inch material; 1 yard of ribbon.

Spend twenty cents for pattern. Write plainly your name, address and style number. Be sure to state size and age.

Address: pattern department, The Edmonton Bulletin, Edmonton, Alberta.

Please allow a week or ten days for delivery.

The New Summer Fashion Book is a "must" for a smart wardrobe. The full color illustrations of new and beautiful styles will help you select your clothes for all occasions. Send for your copy today. The price is 15 cents.

Home Service

To Stay As A Partner
Improve Steps At Home

The "relaxing vine" dancer—she just as much poison ivy to her partner.

A man likes to feel that the girl he's dancing with is as tight and as supple as a rubber band. And though you may think you look dainty draped in your best black shoulder, did you ever catch a glimpse of your backline?

The best dancers know a good posture as well as the right way to do popular steps—and both can be taught at home with simple instructions and diagrams.

To appear graceful a girl should stand straight with her hips held well up under her body. So her weight won't be a drag on her hips and she won't keep her arms up, her body relaxed.

Key for the girl to follow her partner, if she remembers to step a split second after him. He indicates change of direction with his right arm or a turn of the shoulders. You can even brush up on steps, become a popular partner with the help of diagrams and directions in our 32-page booklet. Give basic steps and variations of rumba, tango, waltz, foxtrot, Westchester and drag. Has pointers on posture, leading and following.

Send 15c in coin for your copy of "Home Course in New Ballroom Dancing" to Home Service, The Edmonton Bulletin, Edmonton, Alberta. Be sure to write plainly your name, address, and the name of booklet.

Please allow a week or ten days for delivery.

A lot of gold is to be made in the market with a glass slipper of action. This is the good merchandise.

By MRS. GAYNOR MADDOX

Baked beans, red kidney beans with chopped meat and peppers, usually called chili con carne, spaghetti or macaroni with cheese, meat or tomato sauce, toasted sandwiches and substantial souffles are outstandingly popular American luncheon dishes.

Here are sample luncheon menus accepted by the overwhelming majority of 47,000 members of typical Canadian families questioned in a recent survey: Chowchow, fried premium bacon or cheese souffle, poached potatoes, bread and butter, sliced pineapple, cookies, frankfurters, potato salad, sliced tomatoes, dice pudding.

CHEESE SOUFFLE

(Serves 6 to 8)

Two tablespoons olive oil or vegetable cooking oil, 1 large onion, chopped; 1 piece garlic, chopped; 1 green pepper, chopped; 1 pound round steak, chopped; 1 cup cold water, 2 cups canned tomatoes (or fresh lightly stewed), 1 cup grated cheese, 1 tablespoon Worcestershire sauce.

Heat oil in large frying pan. Add onion, garlic and green pepper. Fry until light brown. Moisten meat with the cold water, then add to pan. Stir well and simmer about 15 minutes. Add tomatoes, grated cheese, salt, pepper and paprika. Mix thoroughly. Turn into top double boiler and cook 1 hour. Add Worcestershire sauce, mix and serve in soufflé dish, dust with Parmesan cheese.

Tomorrow's Menu

BREAKFAST: Orange and grapefruit juice mixed, creamed dried beef on toast, toasted and buttered half rolls, current jelly, coffee, milk.

LUNCHEON: Cheese souffle, tomato and lettuce salad, chocolate grapechnow, tea, milk.

DINNER: Fruit cocktail, roasted fresh pork shoulder, candied yams, green beans, creamed potatoes, lettuce salad, blueberry pie, cheese, coffee, milk.

It was a matter for great secrecy in my youth when some motherless child was adopted by a relative. The only one I knew was a boy being reared by an aunt and his mother was adopted—though everyone else did—he never hinted that he did.

Today adoption is an above-board and commonplace act. Childless parents adopt not one, but two or three children, to build up the family nature has brought them.

Despite its frequency there are still pitfalls to adoption unless the foster parents are forethoughtful as well as sentimental. Both real parents should sign away the child.

The adoption should be made legal. The adopted child should be separated from the real parents and the relationship should end. While any unloved mother might, at the moment, think she never wanted to see her child again, experience at once that this is but a temporary emotion. Later she may find heaven and earth to get him back after the adoptive parents have expended upon him the full measure of their love, devotion and support.

SHOULD BE TOLD

The most frequent question asked me is whether a child should be told of his adoption and when. The answer is always that he should be told and as often and as naturally as one would tell him about his birth.

Adopted children are called "children" because parents have made a free-will selection of them from among many other available children. This, in itself, should convince a child that his own personality survived the selection. Tell the story often and dramatically of the decision to have a baby and then the hunt to find one. And then when "We saw you we knew that we had found our baby."

It will probably be years before the child understands the difference between being adopted by parents and being born to them. But by the time the child is five and the feeling of being one with the family, of being loved and wanted, plus the feeling of distinction adoption gives.

Today's Popular Design

DESIGN NO. 217—BABY'S CAFE WITH HOOD. This simple crocheted item is not difficult to make, and is one of the most useful garments for the infant. Pattern No. 217 contains list of materials needed, illustration of stitches and complete instructions.

To order this pattern, write your name and address on a piece of paper and send with 20 cents in coin to Needlework Department, The Edmonton Bulletin, Edmonton, Alberta.

BRITAIN'S WAR IS CARRIED INTO THE FASHION PICTURE

British and German fashions on the battlefield, are no less enemies in competition for the world style supremacy held by Paris before France's downfall. At left, above, is a Nazi bid for fashion recognition, designed and executed in Germany. It's a play-suit, featuring a high-waisted, blue and white checked, corded skirt topped by a pullover jacket of royal blue. Sweater may also be used with the bathing suit worn under the skirt. Sports clothes have long been a special forte of British designers. At right is a new Victor Steibel model, one of a group British makes are sending to America. The trend jacket has hand-knit sleeves and is worn with matching sweater.

What To Do

When dining at a restaurant how does a man and woman generally sit-opposite each other or does the man sit at the woman's left? If there are two couples having dinner at a hotel and the table is placed at the edge of the dance floor, where does the woman sit?

MISS O. R. S.

Answer: Most tables for two require the man and woman to sit opposite each other, to avoid crowding at the table. The seat placed at a table large enough for four, then the woman should be given the seat with the best view and the man should sit at the woman's left. When the tables are placed diagonally with one corner nearest the dance floor, the two women should be seated facing in toward the dancing, while the men sit with their backs to it. Generally, however, if there are two couples to be seated at a table, the women sit on opposite sides. Where ever possible avoid seating two women or two men side by side.

Our reader on "Books for Parents" contains lots of worthwhile books concerned with all kinds of child-rearing problems. You may have the latest by sending in your request with a three-cent stamp, self-addressed envelope, to Mrs. Edith of the Your Baby and Mine department in care of this newspaper.

Myrtle Meyer Edith will answer your questions about diet, general care and management of children if you will send the little seeds of kindness and sympathy with your letter to Mrs. Edith of the Your Baby and Mine Department, care of this newspaper.

To keep a friend avoid too great intimacies. No friendship in the world could stand what is called "back door neighborliness." People who pop in your house in season and out of season, who know the things they should not know and see the things they should not see get on your nerves and make you hate them for invading your privacy. Short-lived is the friendship that does not respect a recent formality.

Not even friendship has survived too many confidences. Millions of friendships between women have been broken up because they told each other secrets about themselves and family conditions that they repented telling the next day and hated the other for knowing.

Another thing that kills friendship is that too many people regard it as a graft. They consider the sacred name of friendship a cloak to cover up their holding you up. Because it is harder for you to refuse them than it would be a stranger, they borrow money and never pay it back.

They prevent the use of your car, they borrow your books and never return them; they make you do their scrubbing for them. They expect you to take care of their children and their pets when they get off on a vacation. When they put a thousand strains upon your affection for them until, at last, they wear it out.

People lose their friends by plain speaking. "You are am your friend a lot." "You are am your friend a lot."

People lose their friends by plain speaking. "You are am your friend a lot." "You are am your friend a lot."

People lose their friends by plain speaking. "You are am your friend a lot." "You are am your friend a lot."

Your Figure, Madame!

By IDA JEAN KAIN

The latest trick in reducing is the nearest, home ingenious and enterprising manufacturer with an anatomy understanding of the overweight psychology has evolved a method whereby you take his product in place of two meals a day and reduce. You could take anything in place of two meals a day and reduce. You could take an apple but it wouldn't keep the doctor away.

This is just what you need in another guise. Instead of telling you to hold your coloring down 1,000 a day, the proponents of these plans get the same picture before you take a synthetic product low in calories in place of the two meals. If you consistently omit two meals a day, you are fairly certain of reducing; but how the synthetic product will do the protective economy you must have, it's a tricky business.

There are foods in the market which are low in calories and can be safely used in place of high calorie foods. These foods are: Apples, Bananas, Cereals, Coffee, Tea, Eggs, Milk, Nuts, Oats, Potatoes, Raisins, Sugar, and Water.

Nothing in this world can reduce you unless you keep your fat cells under the number of calories expended in energy. Sweat, labor, study, creative, number games and all the long list of "reducers" are futile unless you keep your calorie intake below the number expended in energy. Thus the stored fat is burned to make up the deficit.

Manage, although often advocated for the overweight, is not reducing.

ing it is an excellent means of stimulating the circulation and improving the muscle tone. It shortens the time between meals and measures your measurements. But it does not reduce weight.

I don't want to tell you an exercise as a reducer. The amount you are likely to take regularly will not help you to lose any appreciable number of pounds. When you consider the number of calories you have to burn in exercise—4300 to lose one single pound of fat, you can see that you would not get away for an exercise if you are as fat as you are.

When you understand the scientific rules of a low-calorie diet and strenuous exercise, it is not so easy for you to be led astray by the promises of a synthetic product.

SUMMER SLIMMING MENU

Breakfast: 1 slice of toast, 1 egg, 1 cup of milk, 1 cup of coffee, 1 cup of cream, 1 rounded tsp. sugar.

Luncheon: Vegetable soup, 1 cup, 1 slice of bread, 1 cup of milk, 1 cup of coffee, 1 cup of cream, 1 rounded tsp. sugar.

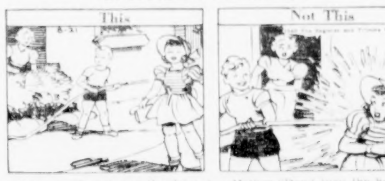

Dinner: Ham, boiled, 2 slices, 1 cup of milk, 1 cup of coffee, 1 cup of cream, 1 rounded tsp. sugar.

Total calories for day: 1,050

Pitching Need
Arrow Finale

YET another day of the season's most exciting and dramatic events is before us. The pitching contest between the Dodgers and the Arrows is the first of a series of three games which will determine the winner of the Central Alberta Baseball League championship series.

The Dodgers open the best of five series for the title at Ponoka this evening. The second game is here Thursday evening and the third is back at Ponoka on Sunday afternoon.

The Arrows have a chance to win the title if they can win the first two games. They have a chance to win the first game if they can win the first two games.

Arrows Hang Up Their Spikes

THE Arrows have hung up their spikes for good. They have won the Central Alberta Baseball League championship series and will play the final game of the season at Ponoka this evening.
